

Partial Simulation Set-Up

Stella Architect 2.1.1

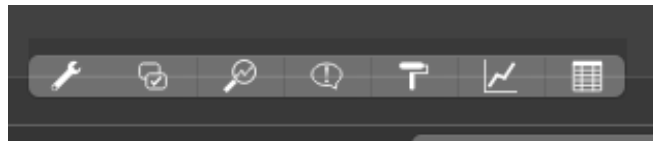

May 27, 2021

Model Settings

When you are in the Model Window, double-click in an empty space and the Model Settings Window will open.

By default, that window is docked on the right-hand side. It can un-docked for placement and enlargement anywhere in the Model Window.

At the bottom, there are other window options:

model settings

partial simulation set-up

model analysis tools

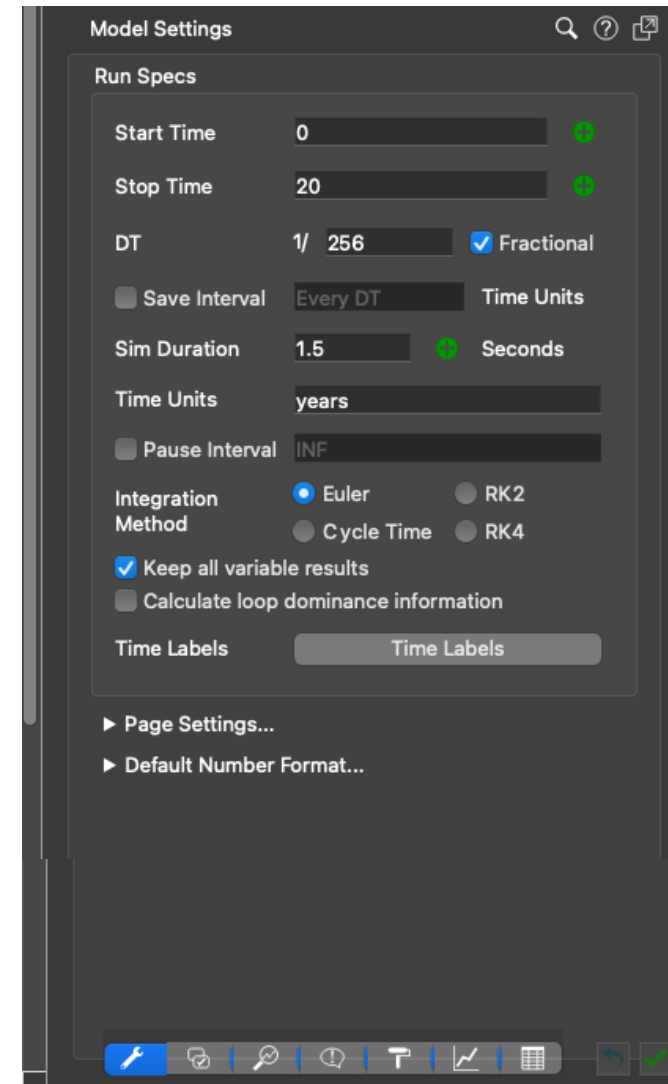

simulation events

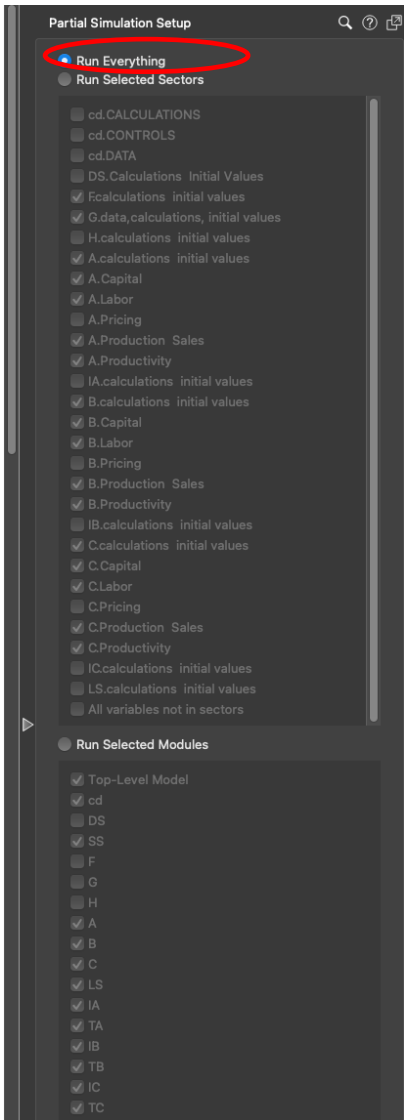

model styles

global graph styles

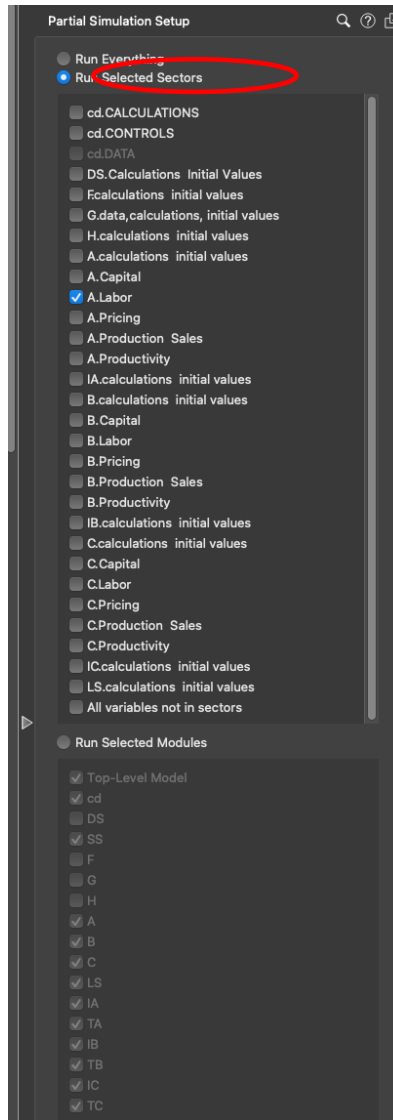

global table styles

select 'partial simulation set-up'

Run Everything,
just as the name says.

Run Selected Sectors

Only selected sectors
will run. Here, only the
Labor sector in the
A module will run.

Run Selected Modules

Only selected modules
will run. Here, the
Demand Side (DS),
Firms (F), Government (G),
and Households (H)
modules will NOT run.
